TechX

Accelerating Innovation

TechX Pioneers programme

Accelerate your business into the energy industry

The Oil & Gas Technology Centre TechX Pioneer programme is a unique technology accelerator and incubator that helps smaller, ambitious technology developers take their solutions to the oil and gas market – faster.

Our Pioneer programme provides game-changing funding – with up to £100,000 available to start-ups with new technology ideas with no equity or payback, as well as the developers retaining all intellectual property.

The 16-week intensive accelerator programme provides unprecedented access to over 120 expert mentors and global partners in the oil and gas industry for business advice and to develop and validate new technologies, as well as unrivalled access to market, making sure Pioneers are both technology, commercial and investor ready.

Upon successful completion of the 16-week programme, you are moved into TechX Plus which offers a further 12 months support via our incubator programme.

Support with visa applications for those based outside the UK is available via our special Tier 1 Entrepreneurial Visa Status with the Home Office.
